

# VEHICLE WRAP MAINTENANCE GUIDE

Your vehicle has been wrapped in a long term digitally printed vinyl material. To maximise the life expectancy from this material it needs to be maintained and cleaned correctly. A vehicle wrap will never be a substitute for a re-spray as some areas i.e. moving parts, cannot be successfully wrapped. We have therefore covered your vehicle in such a way as to give the most aesthetically pleasing effect possible. To ensure longevity of your vehicle wrap, we offer the following advice:

- Following installation of your wrap, please do not clean vehicle for 7 days, ensuring full adhesion of the graphics.
- After 7 days, your vehicle can be cleaned using a brush and a non-abrasive detergent, free from strong solvents or alcohols and high acid/alkaline levels.
- Care must be taken if using a jet wash. It should be used at a distance and take care to avoid exposed edges. Failure to do so could result in water becoming trapped under the material which can cause lifting and bubbles.
- If jet washing please keep the nozzle 1m from and at 90 deg to the graphics. Ensure the nozzle is set to a wide-angle spray and the pressure is kept below 1200psi (80 bar). Keep the water temperature below 60 deg C.
- It is advisable not to use an automated vehicle washer or steam cleaning methods as the heat can affect the adhesion of the vinyl.
- It is advisable to periodically inspect your wrap as part of your vehicle maintenance checks, paying particular attention to edges and any curved sections. If there are any areas of concern, please contact us immediately as this can be easily and quickly rectified.
- The warranty provided by EPIC Media Group will become invalid if correct care and maintenance is not undertaken. A full inspection will be carried out following any reports of failure of the wrap or areas thereof. The wraps are guaranteed against fading and breakdown of the vinyl for a period of 3 years (Although this warranty is limited to 3 years, in reality, if correctly cared for and maintained as outlined above, the wraps would last for 5-7 years).
